

I am a qualified linguist, specialized in English and German Languages and World Literature turned teacher, who has worked in Egypt and Ukraine for the major part of my career. I received my BA in English and German Languages at Cherkassy State University in Ukraine. I obtained my PGCE in Primary Education at the University of Sunderland in the UK. I have a confident grasp of the National curriculum of England and Wales, especially working with APP and AFL.

I believe that every child is capable of being a fantastic learner. With expert guidance right from the very start and infused with energy, the doors of learning shall be opened to every child.

I use a strategy of creating an environment where my subject knowledge and creativity is utilized to maximum effect, to foster curiosity and engagement for concepts taught, in a way that ensures the curiosity for learning continues, long after the lesson ends. I encourage young learners to constantly push themselves beyond the limit of what they believe themselves capable of, knowing that we are all able to become the best versions of ourselves in whatever we do.
